SYSTRAN 7

Quick Start Guide

Ref : DSK-7-QSG-HO-EN

Welcome

Congratulations on your SYSTRAN 7 purchase which uses the latest generation of language translation products from SYSTRAN, the leading supplier of translation software.

SYSTRAN 7 offers a variety of features and capabilities for the translation of text in any Windows-based application. A new common interface is always available, allowing you to perform translations between more than 50 of the world's most common language pairs.

The software quickly yields a gisting-level translation (the ability to understand the general idea of what is written) and even better translation quality when users take the time to train the software to learn their company or subject terminology.

This Quick Start Guide will help you install and immediately begin using your new SYSTRAN 7 product. The following table summarizes the topics in this Guide and how they match your product.

Topics	Page	Home Translator	Office Translator

For more detailed information about the use of SYSTRAN 7 features, refer to the SYSTRAN 7 Desktop User's Guide, or click Help in the product.

- Available translation features and options vary depending on the product you purchased. See pages 17-18 of this Quick Start Guide.

Installing, Activating, and Registering SYSTRAN Desktop 7

You can initiate the installation of SYSTRAN Desktop 7 using either a purchased DVD or an executable application (downloaded product) purchased online. Of course, as with all software installation, there are decisions and choices you will need to make as you proceed.

To use SYSTRAN Desktop 7 your system must meet the following minimum requirements:

Processor	PC with Intel® Pentium® 1.2 GHz processor, or equivalent AMD® processor, or higher
Memory	Minimum 1GB RAM (Windows XP), 2 GB RAM (higher Windows versions)
Disk Space	300 MB for base software 100 MB per language pair 500 MB available free space during installation plus additional space as needed to unzip downloaded product
Operating System	Microsoft® Windows XP Home, XP Professional, Windows Vista, or Windows 7

You must have the following products installed on your PC to fully use SYSTRAN Interactive Translator and the SYSTRAN Toolbar:

Microsoft Office	Microsoft® Office® XP, 2003, 2007, or 2010
Web Browsers	Microsoft® Internet Explorer® 6.0 or later (free download available at www.microsoft.com) or Mozilla® Firefox® 2.x or later (free download available at www.mozilla.com)

Installing SYSTRAN Products

Procedures for installing new SYSTRAN products depend on the manner in which you acquired these products.

- [Installing from a Downloaded File](#)
- [Installing from a Packaged DVD or Backup DVD](#)

You will need a valid serial number to install your SYSTRAN product. If you purchased your SYSTRAN product in DVD format your serial number will be found inside the packaged DVD, and if you purchased your SYSTRAN product online your serial number will be sent to you via email. Keep your serial number in a safe place in case you need to reinstall your SYSTRAN product.

- Prior to installing any SYSTRAN product you should ensure that your Windows installation is fully up-to-date. Also, if you are running a version of Microsoft Office prior to Office 2007, you should ensure that you have installed the *Microsoft Office Compatibility Pack for Word, Excel, and PowerPoint File Formats* pack, which allows

these older versions of Office to open and save files created in the newer Microsoft Office formats (.docx, .xlsx, and .pptx). Visit <http://download.microsoft.com> for more information.

Starting from a Downloaded File

- 1) Double-click on the downloaded file and select a temporary extraction folder (this is not the folder where the software will be installed). The installation program will be extracted into this folder.
- 2) If the installation does not automatically launch, double-click the `setup.exe` in the extraction folder.
- 3) Next, refer to [Completing Your Installation](#).

Starting from the Packaged DVD or Backup DVD

- 1) Insert the installation disk in the DVD drive. If Autorun does not start click on the `setup.exe` in the installer directory.
- 2) Next, refer to [Completing Your Installation](#).

Completing Your Installation

- 1) Select your installation language. The installation software checks for the .NET Framework and other required software on your PC and installs whatever packages are needed.
- 2) Click **Next** on the SYSTRAN – InstallShield Wizard Welcome screen.
- 3) Click **Yes** to accept the **License Agreement**.
- 4) Enter a User Name, Company Name, and Serial Number and click **Next**.
- 5) Select **Complete** installation. Accept the Destination Folder and click **Next**.

If you select **Custom** installation, check the box for each feature and language pair to install. Uncheck features and language pairs you do not want to install.

- 6) Click **Next** to initiate the installation. The progress bar shows installation status.
- 7) **Activate** and **Register** your SYSTRAN product (refer to [Activating SYSTRAN Products](#) and Registering Your SYSTRAN Product).
- 8) Click **Finish** to complete the installation.

Activating SYSTRAN Products

You must activate your SYSTRAN product to use it beyond the trial period.

- You can have more than one SYSTRAN product license active on a PC at the same time (e.g. licenses offering multiple language pairs).

SYSTRAN 7 – Quick Start Guide

Your first opportunity to activate your SYSTRAN product is at the end of the installation process.

- If you choose not to activate your product at installation, each time you start your SYSTRAN product thereafter the Product Activation dialog will display, detailing your SYSTRAN licenses and their activation status.

Click **Activate your product now** to continue. The following screen, **Product activation**, presents you with the following options: **Activate automatically** and **Activate manually**.

Three methods are in place by which you can activate your SYSTRAN software: [Automatic Activation](#), [Activate by Phone](#), and [Activate by Web](#).

- No personal information is sent to SYSTRAN as a result of the Activation process.

Automatic Activation

Assuming you have an active Internet connection, when you click **Activate automatically** on the **Product activation** screen, SYSTRAN Desktop 7 will send your Serial Number and Identification Number to SYSTRAN to activate your product.

Following successful product activation the **Product registration** dialog will display.

- If you encounter any problems activating your SYSTRAN product, please contact SYSTRAN Technical Support at <http://www.systransoft.com/translation-support/v7-desktop-products>.

Activate by Phone

Click **Activate manually** on the **Product activation** screen to display the **Activate manually** screen, which offers SYSTRAN support telephone numbers that you can call to obtain your Activation Number.

Enter the Activation Number provided over the phone into the **Enter your Activation Number** field and click **Next >**.

Following successful product activation the **Product registration** dialog will display.

- If you encounter any problems activating your SYSTRAN product, please contact SYSTRAN Technical Support at <http://www.systransoft.com/translation-support/v7-desktop-products>.

Activate by Web

Click **Activate manually** on the **Product activation** screen to display the **Activate manually** screen, which offers a Web link that you can use to obtain an Activation Number and the field into which you will enter that number for activation.

Enter the Activation Number provided over the Web into the **Enter your Activation Number** field and click **Next >**.

Following successful product activation the dialog the **Product registration** form will display.

- If you encounter any problems activating your SYSTRAN product, please contact SYSTRAN Technical Support at <http://www.systransoft.com/translation-support/v7-desktop-products>.

Managing Your SYSTRAN Account

You can easily log into and manage your SYSTRAN account via the SYSTRAN Website (www.systransoft.com / www.systran.fr). Also, once your SYSTRAN Desktop 7 product is registered you can access your SYSTRAN account information by clicking the **My SYSTRAN Account** section in **SYSTRAN Global Options | Application Settings**.

Translating Online Using SYSTRANet

If you are a registered user of a SYSTRAN Desktop 7 product, and a subscriber to SYSTRANet online translation service, you can translate online and benefit from special SYSTRANet translation features directly from your SYSTRAN Desktop 7 applications.

Leveraging Your Resources Using the SYSTRAN Customization Wizard

SYSTRAN Customization Wizard automatically uses the content of your files and emails to learn new terminology and improve the quality of your translations. It extracts and analyzes the text contained in your data and builds linguistic resources (Wizard User Dictionaries and Language Models) that will be used by your SYSTRAN Desktop 7 product to adapt the translation to your domain(s).

SYSTRAN Customization Wizard allows you to select:

- Which text to scan from any files or email folders
- The language pairs for which you want to build linguistic resources

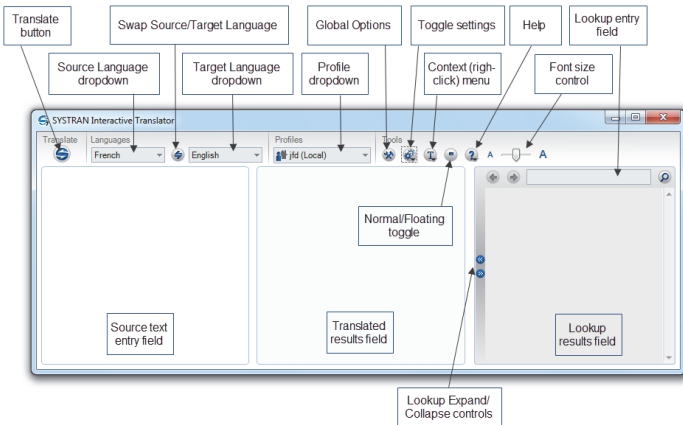

This feature is available in all SYSTRAN Desktop 7 products. SYSTRAN Business Translator and SYSTRAN Premium Translator allow you to manage multiple configurations. A configuration records the list of resources to scan and the target language pairs. Managing several configurations allows you to adapt SYSTRAN machine translation to multiple domains corresponding to different content stored on your machine (e.g. technical, cooking).

Using the SYSTRAN Interactive Translator

Translating Text

Using the SYSTRAN Interactive Translator, you can translate text from any Windows application simply by cutting/copying and pasting it into the Translator's source text entry field. You can also type text directly into the source panel for translation.

- 1) Start the SYSTRAN Interactive Translator either by clicking the **SYSTRAN Interactive Translator** icon on your Windows Desktop, or by clicking **Start > All Programs > SYSTRAN > SYSTRAN Interactive Translator**. The SYSTRAN Interactive Translator appears.
- 2) Use the **Source language** dropdown to select a source language.
- Activate automatic language detection by selecting Auto in the Source language dropdown.
- 3) Use the **Target language** dropdown to select a target language.
- 4) Input the text into the source text entry panel of the SYSTRAN Interactive Translator. Note that prior to being translated the input text will display in grey.
- 5) Click the **Translate** button . The translated text appears in the translated results field of the SYSTRAN Interactive Translator.
- By default, SYSTRAN Interactive Translator is set to Translate During Typing. You can change this setting via the toggle setting or with the SYSTRAN Global Options dialog.

Shortcut

Enter text to be translated in the source text entry field of the SYSTRAN Interactive Translator.

Press **Ctrl+Shift+T**. The translated text appears in the translated results field of the SYSTRAN Interactive Translator.

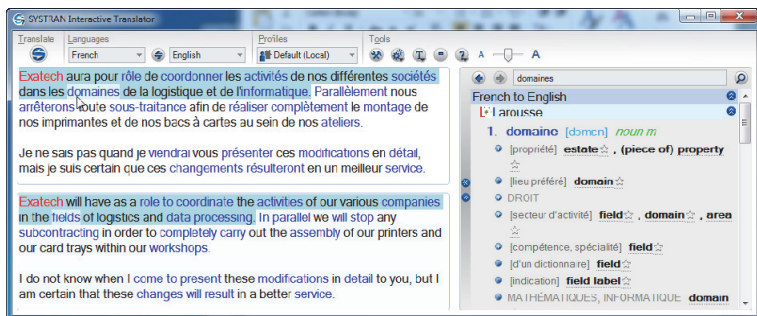

- You can change the keyboard shortcut via the **SYSTRAN Global Options** dialog, and if you are using Firefox you may want to do so to avoid conflicts.

To aid in evaluating your translation, once results are present in the SYSTRAN Interactive Translator terms and sentence highlighting is applied in accordance with the [SYSTRAN Global Options](#) settings indicated in **Application Settings|SYSTRAN Interactive Translator|Text highlighting**.

Looking up a Term

You can look up a term in any of your installed dictionaries using the SYSTRAN Interactive Translator.

- 1) Click the SYSTRAN Interactive Translator icon on the Desktop, or click Start > All Programs > SYSTRAN > SYSTRAN Interactive Translator. The SYSTRAN Interactive Translator displays.

- 2) Ensure that the correct source-target language combination is set for your term lookup, and if necessary make the appropriate changes using the SYSTRAN Interactive Translator's Source Language and Target Language dropdowns.
- 3) Enter the term whose definitions you want to learn into the Dictionary Lookup text entry field on the SYSTRAN Interactive Translator.
- 4) Type the term directly into the text entry field.
-- or --
Highlight the term in either the source text or the translated results field.
- 5) Right-click and select **Lookup** from the context menu.

SYSTRAN 7 – Quick Start Guide

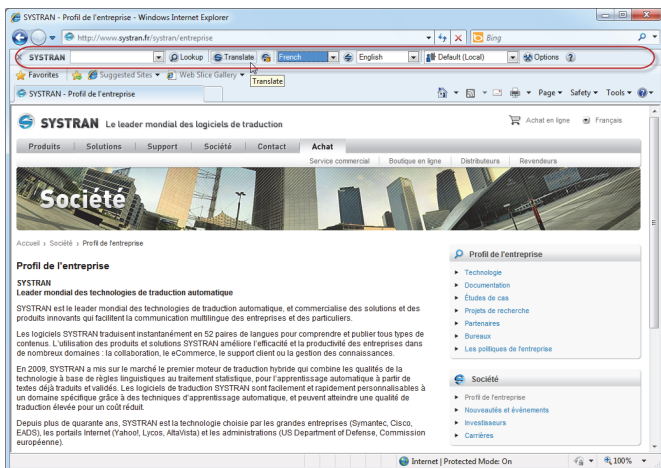

6) Click the **Lookup** button  to the right of the field. Lookup results will display in the SYSTRAN Interactive Translator's **Lookup** results field.

■ SYSTRAN 7 provides a great deal of information in the list of meanings for a Lookup term. Each entry may include information about the domain, usage, language level, and grammatical category of the entries. Refer to Codes for Lookup Results for more information on the codes that may display in your Lookup results

Translating Web Pages

The SYSTRAN Toolbar is integrated into your Web browser when you install SYSTRAN Desktop 7. By default, this Toolbar appears when you open the browser. To hide it, select the **View|Toolbars|SYSTRAN Toolbar 7** menu command. To redisplay it, repeat this procedure.

- ▶ If you want to move the SYSTRAN Toolbar (Internet Explorer only), you must first unlock the browser toolbars. Select the **View|Toolbars|Lock the Toolbars** menu command to remove the checkmark next to it.
- 1) Use the browser to navigate to a Web page. If Automatic language detection is enabled, the detected language will automatically appear in the **Source language** dropdown.
- 2) Use the **Source language** dropdown to change the selected source language.
- 3) Use the **Target language** dropdown to select a different target language.
- 4) Click the **Translate** button to display the translated page.

■ Use the **Translation Options** dialog box to specify if the translated page should appear in a new window or in the original window. In Firefox, you may also display the translated page in a new tab.

Translating Selected Web Page Text

You can use the right-click context menu to translate selected text on a Web page.

What Is Machine Translation?

Machine translation (MT) is automated translation. It is the process by which computer software is used to translate a text from one natural language (such as English) to another (such as Spanish).

To process any translation, human or automated, the meaning of a text in the original (source) language must be fully understood. For this purpose, the computer software must be able to analyze all of the elements in the text and know how each word works in the target language. In other words, it is far more complex. Translation is not a mere word-for-word analysis of the text. It requires the expertise in grammar, syntax (sentence structure), semantics (meaning), and familiarity with each local region.

- 1) Set your source and target languages.
- 2) Select text to translate.
- 3) Right-click the selected text and select **SYSTRAN Translate** from the popup menu.
- 4) A translation of the selected text appears in the lower right of the Desktop.

Translating Microsoft Office Files

To translate Word documents, PowerPoint presentations, and Excel spreadsheets:

- 1) Open the document, presentation, or spreadsheet you want to translate.
- 2) If Automatic language detection is enabled, the detected language will automatically appear in the **Source language** dropdown. Use the **Source** and **Target** dropdown lists to change the source or target language

SYSTRAN 7 – Quick Start Guide

- 3) Click the **Translate** button on the SYSTRAN Toolbar, or click the right mouse button to open a popup menu for additional translation options. The translated file appears in a new window as a read-only file. You can save the translated file using the standard Windows **File, Save** function.

For Office 2007 and Office 2010:

- 1) Click the **SYSTRAN** tab to reveal the **SYSTRAN** tab group in the ribbon.

- 2) If Automatic language detection is enabled, the detected language will automatically appear in the **Source language** dropdown. Use the Source and Target dropdown lists to change the source or target language.

- 3) Select a Profile to apply for the translation.
- 4) Click the **Translate** button droplist in the tab group and indicate **Translate Document**.

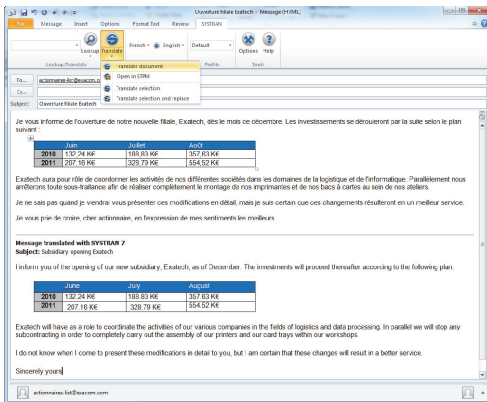

The translated file appears in a new window as a read-only file. You can save the translated file using the standard Windows **File|Save** function.

Translating Email in Microsoft Outlook

When SYSTRAN Desktop 7 translates an email, the source (original) text and target (translated) text appear in a revised email, separated by a banner.

- 1) Open Microsoft Outlook.
- 2) Open a message that you want to translate, or type a new message.
- 3) Use the **Source** and **Target** dropdown lists to change the source and target languages.
- 4) Click the **Translate** button. SYSTRAN Desktop 7 translates the email, inserts the translated text into the same email as the source text, and places a banner between the two versions.

- If you are using Word as your email editor, you will see a new email message with the translated text when you click **Translate**, and not the split-panel display illustrated above.

For Office 2007 and Office 2010:

Unlike other Microsoft Office 2007 applications, Outlook 2007 maintains the layout of menus and toolbars utilized in previous versions. It is only at the actual email level that Office 2007's characteristic Tab-Ribbon design comes into play.

- 1) Open an email that contains text you want to translate, or start a new email and enter text to be translated.
- 2) Click the **SYSTRAN** tab to reveal the **SYSTRAN** tab group in the ribbon.

SYSTRAN 7 – Quick Start Guide

- 3) Use the **Source** and **Target** dropdown lists to change the source and target languages, as necessary.
- 4) Click the **Translate** button droplist in the tab group and indicate **Translate Document**. SYSTRAN Desktop 7 translates the email, inserts the translated text into the same email as the source text, and places a banner between the two versions.

-- or --

Highlight a portion of the email you wish to translate, then click the **Translate** button droplist and select **Translate selection** to translate the selected text.

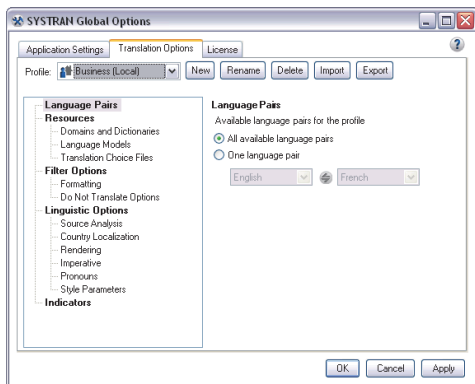

-- or --

Click the **Translate** button droplist and select **Translate selection and replace**. SYSTRAN Desktop 7 translates the selected text and replaces the source text with the translated text.

Setting Your Global Options

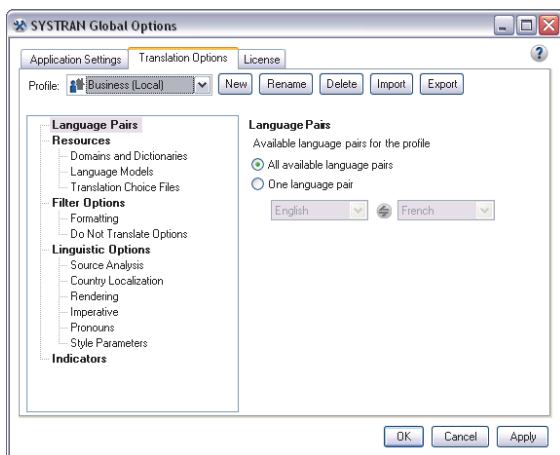

The **SYSTRAN Global Options** dialog box includes three tabs: **Application Settings**, **Translation Options**, and **License**. The options available on each tab depend on the SYSTRAN Desktop 7 product you have installed.

- Each tab has a tree view of option settings in the left panel.
- Each section in the tree view can be collapsed or expanded.
- Select an option in the left panel to display its settings in the right panel.

Translation Options

The **Translation Options** tab allows you to control how SYSTRAN Desktop 7 translates your files. Settings are organized in categories, and individual settings depend on the SYSTRAN Desktop 7 product(s) installed and activated on your PC.

Profiles

Translation Option settings can be saved in Profiles, allowing different users to select their own preferred options when working with SYSTRAN V7 products. User Profiles can be saved, exported and imported.

When a Profile is selected, all options associated with that Profile are loaded. If no profile is selected, SYSTRAN V7 will use the default Option settings.

Creating a Profile

- 1) Click the **New** button to open the **New Profile** dialog box. Enter a name for the new profile in the **Profile name** field. Also, if the Service for the profile is to be of a remote nature, specify it using the provided dropdown and click OK. Enter a name for the Profile and click **OK**. The new profile name will display in the **Profile** list box
- 2) Enter Translation Option settings for the new profile.
- 3) Click **Apply** to save the new profile, or **OK** to save the new profile and exit the **SYSTRAN Global Options** dialog.

Using SYSTRAN Dictionary Manager (SDM)

SYSTRAN Dictionary Manager (SDM) lets you create, and maintain User Dictionaries (UDs), which can be used to customize and improve your translations.

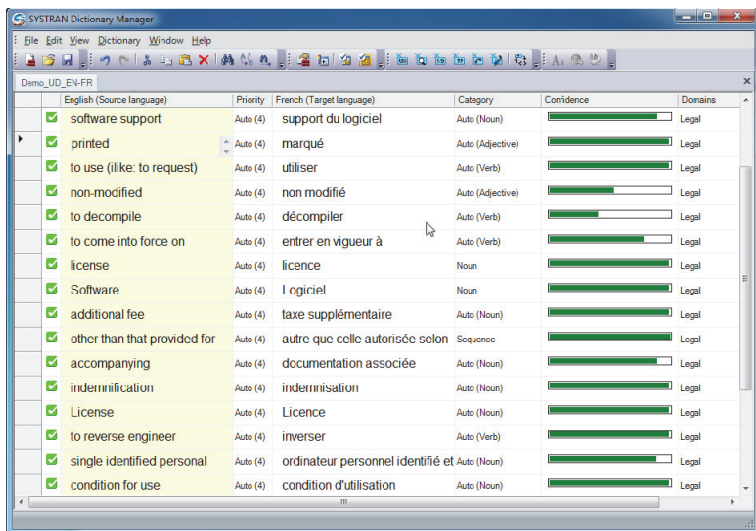

SYSTRAN 7 – Quick Start Guide

Dictionary resources can be used for a number of functions, including:

- Translating terms not found in the SYSTRAN Main Dictionary.
- Overriding the target-language meaning of a term in the SYSTRAN Main Dictionary to customize translation output.
- Ensuring that a multi-word expression is always treated as a single unit by the translation software.

Launching SYSTRAN Dictionary Manager (SDM)

Double-click the SYSTRAN Dictionary Manager icon on your Desktop, or click **Start** on the Windows Taskbar and select **All Programs > Systran > SYSTRAN Dictionary Manager**.

Adding Dictionary Entries

UDs include three types of terms:

- Multilingual terms
- Do Not Translate (DNT) terms that should not be translated
- Source Category terms, used to specify the grammatical category of source terms without specifying their translations

After you specify the properties for a UD, you can add source and target language terms to it.

- 1) Click your cursor in an open box in the **Source** column. Enter the term to be translated.
- 2) Move the cursor to the **Target language** box on the same row and enter the target language term.
- 3) Click in the **Category** box to display the **Category** dropdown and select the grammatical category of the word (noun, verb, etc.). You can allow SDM to select a category automatically by selecting **Auto** (refer to [Coding User Dictionary Entries](#)).
- 4) Enter data in any other editable columns.

Coding User Dictionary Entries

Use the **Code Selection** and **Code All** commands in the **Dictionary** menu to check the syntactical accuracy of your UD translations against the SYSTRAN Linguistic Resource database.

Coding an Individual User Dictionary Entry

- 1) Click in any field in the record that is to be coded.
- 2) Select **Code Selection** on the **Dictionary** menu or click the **Code Selection** button on the toolbar to begin the coding process and display the results.

	English (Source lang)	Spanish (Target lang)	Category	Confidence
	frame	chasis	Auto (Unknown)	<input type="text"/>
	control panel	panel de control	Auto (Unknown)	<input type="text"/>
	start menu	menú de comienzo	Auto (Noun)	<input type="text" value=""/>
*				

Display **Confidence** as a UD column by checking the box in the Dictionary Columns toolbox. The Confidence feature measures and displays the level of confidence the software has in the accuracy of coded User Dictionary entries. *You should validate any entry that shows a low confidence level.*

- 3) Double-click the gray box at the far left of an entry to check its confidence level. SDM will check the entry, and the length and color of the bar in the **Confidence** column show the confidence level of the entry. A confidence symbol also appears in the **Status** column next to the entry.

Symbol	Description
	The coding of the entry is evaluated as good by IntuitiveCoding.
	The coding of the entry has been validated through ExpertCoding. This is the highest level of validation.
	The target language entry does not correlate well with the source language entry or a term is unknown or seems irregular to IntuitiveCoding. A message appears in the Status Bar of the SDM screen. The entry will be used in the translation, but will probably require additional coding to work as expected.

SYSTRAN 7 – Quick Start Guide

Symbol	Description
	SDM cannot find any correlation between the source and target language entries or a term cannot be coded at all. The entry will not apply in the translation and needs to be corrected.
	Not yet coded.

- 4) If the bar is short, the software has little confidence in how the entry is coded. To increase the confidence level, revise your source and/or target language entries, and then repeat step 1 above to measure the revised confidence level.

Coding All User Dictionary Entries

- 1) Click in any active field in the dictionary.
- 2) Select **Code All** on the **Dictionary** menu or click the **Code All** button on the toolbar to begin the coding process and display the results.

	English (Source lang)	Spanish (Target lang)	Category	Confidence
▶	<input checked="" type="checkbox"/> frame	chasis	Auto (Noun)	
	<input checked="" type="checkbox"/> control panel	panel de control	Auto (Noun)	
	<input checked="" type="checkbox"/> start menu	menú de comienzo	Auto (Noun)	
*				

- ☰ A **Save** operation automatically codes the entries in the active UD, updates all Dictionary columns, and saves the UD.
